

360-DEGREE WATER ADVENTURE

Aquavolt

L'Odyssée des bâtisseurs

Alma, Quebec, Canada, 2011

Enter the belly of the machine. Let yourself be transported through different eras, places and seasons.

Description

Be prepared to weather the tempest, the cold, fire and water. Visit exceptional spaces and tingle to the rhythm of a circular 360-degree projection in a total immersive experience. From floor to ceiling, let yourself be engulfed. Even the air you breathe has been taken over. The water tower has awoken. Its memory, folly and enthusiasm have taken over.

Not for the faint of heart.
