AUDIO-VISUAL SOLUTIONS

AV EQUIPMENT

LaSalle College

Montreal, Quebec, Canada, 2013

The project that XYZ completed at LaSalle College, a reputed school in Montreal, is a good example of XYZ's ability to provide audiovisual solutions in the corporate and education sector.

Description

One of the components of the project involved improving the efficiency of a small recording studio. XYZ installed acoustic panels and supplied new AV equipment.

XYZ optimised the multipurpose functionality of the J-P Morin hall, which is used for exhibits, conferences and fashion shows. XYZ installed acoustic panels on the walls and ceiling, a movable stage, a projector and a large screen, as well as a sound system suited to the type of room.

Finally, XYZ set up a teaching device in one of the classrooms—a screen and a video projector along with a voice reproduction system with a microphone.
