PRIMARY SOUND SYSTEM

ADVANCED AUDIO SYSTEM

Lake Leamy Casino Theatre

Gatineau, Quebec, Canada, 2013

With a view to presenting musical shows of international calibre, the Lake Leamy Casino decided to source a new audio system for its cabaret theatre. XYZ partnered with Meyer Sound to develop a line array solution customized to the showroom's architecture.

Description

The Lake Leamy Casino Theatre's sound system consists of ultra-compact cabinets that facilitate their handling without compromising power output. This system can also be considered eco-responsible, since it provides optimum performance with minimal electricity consumption.
