THÉÂTRE DES MUSES

EQUIPMENT UPGRADE

Maison des arts de Laval

Laval, Quebec, Canada, 2013

The Théâtre des Muses is a key cultural and artistic venue in Laval and it was in need of a facelift. Its technical infrastructure had become obsolete and an overhaul comprising several elements was necessary: the lifts, the audio equipment, the lighting apparatus and, finally, the video equipment.

Description

Renewing these elements has made it possible for the theatre to offer its artists a technical environment worthy of their creative talents.

XYZ's role in this endeavour was to provide, install, program and calibrate all the audio and video equipment of the renovated space. D&B loudspeakers now offer a remarkable audio quality for this small space with great ambition.
